

Attendance - Late or On Time

	A	B	C	D	E	F	G	H
1	Attendance — Late or On Time							
2	Req: Office starts at 9:30 AM. Students must identify who is Late/On Time and calculate late minutes. Real fields are Employee, Department, Branch, Shift Start, In Time — no unnecessary geography columns.							
3	Emp ID	Employee Name	Department	Branch / Work Location	Shift Start	In Time	Status	Late Minutes
4	GSA-001	Rahim Uddin	Sales	Uttara Branch	9:30 AM	9:12 AM	On Time	0
5	GSA-002	Nusrat Jahan	Accounts	Motijheel Branch	9:30 AM	9:33 AM	Late	3
6	GSA-003	Sabbir Ahmed	Warehouse	Gazipur DC	9:30 AM	9:18 AM	On Time	0
7	GSA-004	Farhana Islam	Customer Support	Banani Office	9:30 AM	11:03 AM	Late	93
8	GSA-005	Imran Hossain	Delivery Ops	Narayanganj Hub	9:30 AM	8:34 AM	On Time	0
9	GSA-006	Mim Akter	HR	Dhanmondi Office	9:30 AM	9:25 AM	On Time	0
10	GSA-007	Rakib Hasan	Sales	Mirpur Branch	9:30 AM	9:10 AM	On Time	0
11	GSA-008	Jannatul Ferdous	Training	Online Team	9:30 AM	9:18 AM	On Time	0

Status: =IF([@[In Time]]>[@[Shift Start]], "Late", "On Time")

Late Minutes: =IF([@[In Time]]>[@[Shift Start]], ([@[In Time]]-[@[Shift Start]])*1440, 0)

Compares In Time against the 9:30 AM Shift Start. When late, the time difference is multiplied by 1440 (minutes in a day) to convert Excel's decimal time into actual minutes late.

Age Calculation - HR / KYC Validation

	A	B	C	D	E	F
1	Age Calculation — HR/KYC Validation					
2	Req: Calculate current age from Date of Birth. Use this for HR recruitment, bank KYC, student admission, insurance customer profile. Keep location only as Home District because full Division/Thana is not necessary here.					
3	Record ID	Person Name	Profile Type	Date of Birth	Home District	Age
4	KYC-1001	Md Shakil Rana	Retail Banking Customer	15-Mar-1998	Dhaka	28
5	KYC-1002	Ayesha Siddika	Job Applicant	20-Jul-2001	Chattogram	24
6	KYC-1003	Tanvir Hasan	Loan Guarantor	05-Nov-1989	Sylhet	36
7	KYC-1004	Rumana Akter	Insurance Customer	10-Jan-1995	Khulna	31
8	KYC-1005	Nabil Chowdhury	Intern Candidate	03-Dec-2006	Rajshahi	19
9	KYC-1006	Mst. Mim Akter	Student Applicant	25-Apr-2004	Barishal	22
10	KYC-1007	Arif Hossain	Supplier Owner	14-Sep-1979	Rangpur	46
11	KYC-1008	Sadia Rahman	Training Learner	30-Jun-1999	Mymensingh	26

Age: `=DATEDIF([@[Date of Birth]],TODAY(),"Y")`

DATEDIF measures the gap between two dates. The "Y" unit returns completed full years - the standard way to calculate age for recruitment, bank KYC, and admission forms.

Employee Service Length / Tenure

	A	B	C	D	E	F
1	Employee Service Length / Tenure					
2	Req: Calculate each employee's service length in Years and Months from Joining Date. This is useful for increment, promotion, gratuity/benefit eligibility, and HR dashboard.					
3	Emp ID	Employee Name	Designation	Department	Joining Date	Service Length
4	EMP-2101	Hasan Mahmud	Finance Executive	Finance	10-Jan-2021	5 Years 5 Months
5	EMP-2102	Sumaiya Akter	Data Analyst	Analytics	15-Aug-2023	2 Years 10 Months
6	EMP-2103	Tariqul Islam	Branch Manager	Retail	01-Mar-2019	7 Years 3 Months
7	EMP-2104	Nadia Sultana	HR Officer	HR	20-Nov-2022	3 Years 7 Months
8	EMP-2105	Sajib Khan	Operations Lead	Operations	07-Jun-2020	6 Years 0 Months
9	EMP-2106	Fahim Rahman	BI Developer	Analytics	12-Feb-2024	2 Years 4 Months
10	EMP-2107	Sharmin Jahan	Training Coordinator	Training	05-Jan-2025	1 Years 5 Months
11	EMP-2108	Rafi Ahmed	Sales Officer	Sales	25-Sep-2018	7 Years 8 Months

Service Length: `=DATEDIF([@Joining Date],TODAY(),"Y") & " Years " & DATEDIF([@Joining Date],TODAY(),"YM") & " Months"`

Two DATEDIF calls in one formula: "Y" gives completed years and "YM" gives the leftover months, joined into a readable tenure string for increment and promotion tracking.

Invoice Aging - Accounts Receivable

	A	B	C	D	E	F	G
1	Invoice Aging — Accounts Receivable						
2	Req: Calculate how many days each invoice has been outstanding from Invoice Date. This is a realistic collection follow-up dataset: customer, channel, sales territory, invoice date, and invoice amount.						
3	Invoice No	Customer Name	Channel	Sales Territory	Invoice Date	Invoice Amount	Aging Days
4	INV-26001	Rahim Store	Retail Dealer	Dhaka North	01-May-2026	125,000	52
5	INV-26002	Karim Traders	Wholesale	Chattogram City	12-May-2026	238,500	41
6	INV-26003	Mymensingh Mart	Retail Dealer	Mymensingh Sadar	25-Apr-2026	98,500	58
7	INV-26004	Sylhet Super Shop	Modern Trade	Sylhet City	29-May-2026	310,000	24
8	INV-26005	Barishal Enterprise	Wholesale	Barishal Sadar	30-Mar-2026	176,000	84
9	INV-26006	Gazipur Fashion	Retail Dealer	Gazipur Chowrasta	20-May-2026	88,500	33
10	INV-26007	Bogura Bazar	Retail Dealer	Bogura Sadar	10-Apr-2026	143,700	73
11	INV-26008	Narayanganj Outlet	Modern Trade	Narayanganj City	01-Jun-2026	402,000	21

Aging Days: `=TODAY() - [@[Invoice Date]]`

The simplest date math in Excel: subtracting one date from another returns the number of days between them - here, how long each invoice has been outstanding.

Payment Status - Credit Control

	A	B	C	D	E	F	G
1	Payment Status — Credit Control						
	Req: Check whether each invoice is Overdue or Within Due Date. Real fields: invoice, customer, territory, due date, due amount, collection owner. No irrelevant Division/Thana columns.						
2							
3	Invoice No	Customer Name	Sales Territory	Due Date	Due Amount	Collection Officer	Payment Status
4	INV-26001	Rahim Store	Dhaka North	03-Jun-2026	125,000	Mehedi Hasan	Overdue
5	INV-26002	Karim Traders	Chattogram City	15-Jun-2026	238,500	Rezaul Karim	Overdue
6	INV-26003	Mymensingh Mart	Mymensingh Sadar	28-May-2026	98,500	Mim Akter	Overdue
7	INV-26004	Sylhet Super Shop	Sylhet City	20-Jun-2026	310,000	Jahid Hossain	Overdue
8	INV-26005	Barishal Enterprise	Barishal Sadar	15-May-2026	176,000	Tania Islam	Overdue
9	INV-26006	Gazipur Fashion	Gazipur Chowrasta	08-Jun-2026	88,500	Rakib Hasan	Overdue
10	INV-26007	Bogura Bazar	Bogura Sadar	01-Jun-2026	143,700	Sabbir Ahmed	Overdue
11	INV-26008	Narayanganj Outlet	Narayanganj City	30-Jun-2026	402,000	Nusrat Jahan	Within Due Date

Payment Status: =IF([@[Due Date]]<TODAY(),"Overdue","Within Due Date")

Checks whether the due date has already passed relative to today, flagging overdue invoices so collection officers know which accounts need follow-up.

Probation End Date - HR Confirmation

	A	B	C	D	E	G
1	Probation End Date — HR Confirmation					
2	Req: Calculate probation end date using Joining Date + Probation Months. This sheet is realistic for HR confirmation planning; Department matters more than full geographic details.					
3	Emp ID	Employee Name	Designation	Department	Joining Date	Probation End Date
4	EMP-3001	Mushfiq Rahman	Junior Data Analyst	Analytics	01-Jan-2026	01-Jul-2026
5	EMP-3002	Afia Tabassum	Sales Executive	Sales	15-Feb-2026	15-Aug-2026
6	EMP-3003	Nayeem Hasan	Support Executive	Customer Support	10-Mar-2026	10-Sep-2026
7	EMP-3004	Mahira Jahan	HR Intern	HR	01-Apr-2026	01-Oct-2026
8	EMP-3005	Shuvo Das	Accounts Assistant	Finance	05-May-2026	05-Nov-2026
9	EMP-3006	Lamisa Islam	Power BI Trainer	Training	20-Jan-2026	20-Jul-2026
10	EMP-3007	Rasel Ahmed	Delivery Supervisor	Operations	28-Feb-2026	28-Aug-2026
11	EMP-3008	Sadia Nusrat	Content Executive	Marketing	25-Mar-2026	25-Sep-2026

Probation End Date: `=EDATE([@[Joining Date]],6)`

EDATE adds a set number of months to a date - here, 6 months after joining and handles month-end edge cases automatically, which manual date addition can't do reliably.

Day Name - Retail Sales Pattern

	A	B	C	D	E	F	G	H
1	Day Name — Retail Sales Pattern							
	Req: Extract day name from sales date and identify weekend. This is useful for understanding weekday/weekend sales pattern, store manpower planning, and campaign timing.							
2								
3	Sales ID	Sales Date	Outlet Name	Category	Sales Amount	Footfall	Day Name	Day Type
4	SLS-7001	01-Jun-2026	Bashundhara City Outlet	Footwear	185,000	340	Monday	Weekday
5	SLS-7002	05-Jun-2026	Jamuna Future Park	Apparel	265,000	520	Friday	Weekend
6	SLS-7003	06-Jun-2026	Chattogram GEC Outlet	Electronics	198,000	410	Saturday	Weekend
7	SLS-7004	07-Jun-2026	Sylhet Zindabazar Outlet	Grocery	92,000	255	Sunday	Weekday
8	SLS-7005	12-Jun-2026	Khulna New Market	Apparel	156,000	360	Friday	Weekend
9	SLS-7006	13-Jun-2026	Rajshahi Shaheb Bazar	Footwear	134,000	315	Saturday	Weekend
10	SLS-7007	14-Jun-2026	Rangpur City Bazar	Grocery	88,000	240	Sunday	Weekday
11	SLS-7008	18-Jun-2026	Mymensingh Town Hall	Electronics	210,000	455	Thursday	Weekday

Day Name: `=TEXT([@[Sales Date]], "dddd")`

Day Type: `=IF(OR(TEXT([@[Sales Date]], "dddd")="Friday", TEXT([@[Sales Date]], "dddd")="Saturday"), "Weekend", "Weekday")`

TEXT converts the date into its weekday name, then OR/IF checks whether that day is Friday or Saturday - Bangladesh's weekend to reveal weekday vs weekend sales patterns.

Monthly Dashboard Helper Columns

	A	B	C	D	E	F	G	H
1	Monthly Dashboard Helper Columns							
2	Req: Create Month End Date and Month-Year helper from sales date. Mentor note: Month End Date is better for Pivot sorting; Month-Year text is only for clean display.							
3	Sales Order	Sales Date	Lead Source	Product/Course	Qty	Revenue	Month End Helper	Month-Year Display
4	SO-1001	03-Jun-2026	Online	Excel Course	1	4,990	30-Jun-2026	Jun-2026
5	SO-1002	16-Jun-2026	Facebook Lead	Power BI Workshop	3	9,000	30-Jun-2026	Jun-2026
6	SO-1003	05-Jul-2026	Corporate	Dashboard Training	12	120,000	31-Jul-2026	Jul-2026
7	SO-1004	20-Jul-2026	Referral	Data Analytics Course	2	30,000	31-Jul-2026	Jul-2026
8	SO-1005	08-Aug-2026	Online	SQL Bootcamp	5	25,000	31-Aug-2026	Aug-2026
9	SO-1006	19-Aug-2026	Facebook Lead	Python for Data	4	28,000	31-Aug-2026	Aug-2026
10	SO-1007	02-Sep-2026	Corporate	Excel Automation	10	95,000	30-Sep-2026	Sep-2026
11	SO-1008	17-Sep-2026	Online	BI Career Program	6	78,000	30-Sep-2026	Sep-2026

Month End Helper: `=EOMONTH([@[Sales Date]],0)`

Month-Year Display: `=TEXT([@[Sales Date]],"mmm-yyyy")`

EOMONTH(date,0) returns the real last day of the month, which sorts correctly in Pivot Tables, while TEXT formats the date as "Mmm-YYYY" purely for clean dashboard display.
