

EXCEL FORMULA CHALLENGE

What's hiding inside your spreadsheet that a formula could find in seconds?

A guided walkthrough of real formula challenges - SUMIFS, XLOOKUP, COUNTIFS, MAXIFS, AVERAGEIFS, IFS and a full Pivot Table dashboard solved and documented step by step.

Q1

SUMIFS - Conditional Total by Region & Threshold

	A	B	C	D	E	F
1	Date	Region	Product	Sales Amount		
2	1/1/2026	Sylhet	Laptop	82859		
3	1/2/2026	Sylhet	Printer	93040		Q.1 Calculate the total Sales Amount for all sales in the Dhaka Region where the Sales Amount is greater than 50,000.
4	1/3/2026	Dhaka	Mobile	114625		
5	1/4/2026	Dhaka	Printer	42377		Ans: 1000149
6	1/5/2026	Khulna	Monitor	103374		
7	1/6/2026	Chattogram	Monitor	88696		Formula: =SUMIFS(Table4[Sales Amount],Table4[Region],"Dhaka",Table4[Sales Amount],">50000")
8	1/7/2026	Chattogram	Monitor	55720		
9	1/8/2026	Dhaka	Monitor	45513		
10	1/9/2026	Dhaka	Printer	44539		
11	1/10/2026	Sylhet	Laptop	80834		
12	1/11/2026	Sylhet	Mobile	35446		
13	1/12/2026	Chattogram	Monitor	39524		
14	1/13/2026	Sylhet	Mobile	104831		
15	1/14/2026	Sylhet	Monitor	30283		
16	1/15/2026	Sylhet	Laptop	57058		
17	1/16/2026	Sylhet	Printer	43613		
18	1/17/2026	Sylhet	Printer	29530		
19	1/18/2026	Khulna	Mobile	33235		
20	1/19/2026	Khulna	Monitor	48011		
21	1/20/2026	Chattogram	Monitor	75620		
22	1/21/2026	Chattogram	Printer	36282		

Solution: SUMIFS adds every Sales Amount where Region is “Dhaka” and the amount exceeds 50,000, returning a total of 1,000,149.

Q2

SUMIFS - Multi-Condition Sum with Date Range

	B	C	D	E	F	G
1	Region	Product	Sales Amount			
2	Sylhet	Printer	34342			
3	Sylhet	Printer	75159			Q:2 Calculate the total Sales Amount for the Laptop product in the Dhaka Region between 01-Jan-2026 and 31-Mar-2026 , where the Sales Amount is greater than 30,000.
4	Chattogram	Monitor	107860			
5	Chattogram	Laptop	133324			Ans: 592601
6	Dhaka	Mobile	83704			
7	Chattogram	Printer	83538			
8	Dhaka	Printer	32807		Formula:	=SUMIFS(Table5[Sales Amount],Table5[Product],"Laptop",Table5[Region],"Dhaka",Table5[Date],">="&DATE(2026,1,1),Table5[Date],"<="&DATE(2026,3,31),Table5[Sales Amount],">30000")
9	Khulna	Mobile	126553			
10	Dhaka	Printer	15915			
11	Sylhet	Printer	124046			
12	Dhaka	Monitor	118225			
13	Khulna	Monitor	111100			
14	Sylhet	Monitor	72139			
15	Khulna	Mobile	123593			
16	Sylhet	Printer	128942			
17	Khulna	Printer	128009			
18	Chattogram	Laptop	24799			
19	Chattogram	Laptop	93037			
20	Dhaka	Laptop	109496			
21	Dhaka	Printer	62010			
22	Chattogram	Laptop	58848			
23	Khulna	Printer	116449			

Solution: SUMIFS layers four conditions - Product, Region, a Jan-Mar 2026 date window, and a 30,000 minimum to reach 592,601.

Q3

XLOOKUP - Pulling Customer Name & Region

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S
1	Invoice No	Customer ID	Customer Name	Region	Order Qty	Unit Price													
2	INV001	C120	Tania	Chattogram	6	2931													
3	INV002	C104	Rima	Khulna	15	3621													
4	INV003	C124	Rifat	Khulna	1	3657													
5	INV004	C122	Nabila	Khulna	6	554													
6	INV005	C103	Sadia	Khulna	17	2533													
7	INV006	C105	Nadia	Khulna	12	3835													
8	INV007	C124	Rifat	Khulna	10	3934													
9	INV008	C129	Nabila	Sylhet	8	1200													
10	INV009	C102	Nadia	Chattogram	9	1207													
11	INV010	C124	Rifat	Khulna	17	3195													
12	INV011	C125	Jui	Sylhet	7	1133

28	INV027	C109	Tania	Khulna	11	3953													
29	INV028	C115	Nadia	Dhaka	19	2773													
30	INV029	C108	Nadia	Chattogram	14	3598													
31	INV030	C106	Sadia	Khulna	14	2562													
32	INV031	C129	Nabila	Sylhet	16	1457													
33	INV032	C112	Rifat	Khulna	11	2668													

Q:3

Using the Customer ID from the Customer Master sheet, retrieve the Customer Name and Region

Additional Challenge:
If the Customer ID is not found, return "Customer Not Found".

Customer-Name: =XLOOKUP([@[Customer ID]],Customer_master[Customer ID],Customer_master[Customer Name],"Customer Not Found")

Region: =XLOOKUP([@[Customer ID]],Customer_master[Customer ID],Customer_master[Region],"Customer Not Found")

Solution: XLOOKUP matches each Customer ID against the Customer Master sheet to fetch the Name and Region, showing “Customer Not Found” for any unmatched ID.

Reference Table - Customer Master

	A	B	C	D
1	Customer ID	Customer Name	Region	
2	C101	Rima	Sylhet	
3	C102	Nadia	Chattogram	
4	C103	Sadia	Khulna	
5	C104	Rima	Khulna	
6	C105	Nadia	Khulna	
7	C106	Sadia	Khulna	
8	C107	Rahim	Khulna	
9	C108	Nadia	Chattogram	
10	C109	Tania	Khulna	
11	C110	Rima	Dhaka	
12	C111	Tania	Chattogram

< > Q1 Q2 Sales Data Customer Master

The lookup source: A clean table pairing every Customer ID with its Customer Name and Region, used by the XLOOKUP formulas on the Sales Data sheet.

Q4

XLOOKUP - Employee Lookup with Last-Match Logic

	A	B	C	D	E	F	G	H	I	J	K	L	M
1													
2	Employee ID	Emp Name	Department	Salary									
3	E110	Jui	Sales	90000									
4	E114	Jui	HR	35826									
5	E103	Jui	Sales	48286									
6	E124	Karim	HR	70219									
7	E124	Karim	HR	70219									
8	E121	Karim	HR	78476									
9	E104	Sohan	IT	60818									
10	E101	Rifat	HR	70000									
11	E113	Nadia	IT	72444									
12	E120	Sadia	Sales	78976									
13	E122	Sadia	IT	57522									
14	E109	Rima	IT	32340									
15	E101	Rifat	HR	70000									
16	E111	Tania	HR	36029									
17	E104	Sohan	IT	60818									
18	E106	Sadia	Sales	45834									
19	E115	Nabila	HR	80000									
20	E121	Karim	HR	78476									
21	E119	Tania	Sales	69579									
22	E116	Rima	Sales	31666									
23	E129	Tania	Sales	53250									
24	E113	Nadia	IT	72444									
25	E128	Tania	HR	42536									
26	E128	Tania	HR	42536									
27	E113	Nadia	IT	72444									
28	E124	Karim	HR	70219									
29	E120	Sadia	Sales	78976									
30	E130	Rima	HR	84704									
31	E111	Tania	HR	36029									
32	E111	Tania	HR	36029									
33	E107	Karim	HR	85535									

Q:04

Using the Employee ID retrieve the Employee Name, Department, and Salary from the Employee Master sheet.

Additional Challenges:

- If the Employee ID is not found, return "Invalid Employee ID".
- Return the Last Match for Salary.

Example:

If the same Employee ID appears multiple times in the Employee Master sheet, return the Salary from the last occurrence.

Emp Name: =XLOOKUP([@[Employee ID]],EmployeeMaster[Employee ID],EmployeeMaster[Employee Name],"Invalid Employee ID")

Dept: =XLOOKUP([@[Employee ID]],EmployeeMaster[Employee ID],EmployeeMaster[Department],"Invalid Employee ID")

Salary: =XLOOKUP([@[Employee ID]],EmployeeMaster[Employee ID],EmployeeMaster[Salary],"Invalid Employee ID",0,-1)

Solution: XLOOKUP retrieves Name, Department, and Salary by Employee ID; the Salary lookup uses search mode -1 so a repeated ID returns its last occurrence, with "Invalid Employee ID" as the fallback.

Reference Table - Employee Master

	A	B	C	D	E	F	G
1		Employee ID	Employee Name	Department	Salary		
2		E101	Rifat	HR	58601		
3		E102	Karim	Accounts	36748		
4		E103	Jui	Sales	48286		
5		E104	Sohan	IT	60818		
6		E105	Rifat	Accounts	79122		
7		E106	Sadia	Sales	45834		
8		E107	Karim	HR	86625

29	E103	HR	Absent	6/2/2026									
30	E126	IT	Absent	6/14/2026									
31	E123	Sales	Present	6/21/2026									
32	E107	IT	Present	6/22/2026									
33	E116	Sales	Absent	6/12/2026									

Q:05

Count the number of employees who were Present in the IT Department during June 2026.

ANS:

19

Formula:

=COUNTIFS(Table11[Status],"Present",Table11[Department],"IT",Table11[Date],>=&DATE(2026,6,1),Table11[Date],<=&DATE(2026,6,30))

Q1 Q2 Sales Data Customer Master Employee Attendance Employee Master Q5 Q6 Q7 ... + :

Solution: COUNTIFS counts rows where Status is “Present,” Department is “IT,” and the Date falls within June 2026, giving a result of 19.

Q6

MAXIFS - Highest Sale Under Two Conditions

	A	B	C	D	E	F	G	H	I	J
1	Region	Product	Sales Amount							
2	Khulna	Mobile	70203							
3	Khulna	Laptop	128848							
4	Chattogram	Laptop	61870							
5	Khulna	Printer	36786							
6	Chattogram	Monitor	16289							
7	Chattogram	Printer	52998							
8	Sylhet	Laptop	17717							
9	Khulna	Mobile	126556							
10	Dhaka	Laptop	88718							
11	Sylhet	Laptop	82957							
12	Chattogram	Mobile	24111							
13	Dhaka	Monitor	46772							
14	Dhaka	Monitor	85024							
15	Chattogram	Mobile	62920							
16	Khulna	Monitor	66887							
17	Chattogram	Laptop	114226							
18	Chattogram	Monitor	30450							
19	Sylhet	Laptop	61625							
20	Dhaka	Laptop	120411							
21	Dhaka	Mobile	66359							
22	Khulna	Monitor	122766							
23	Dhaka	Mobile	91305							
24	Dhaka	Mobile	108512							
25	Dhaka	Mobile	70486							
26	Khulna	Mobile	11256							
27	Dhaka	Mobile	34426							
28	Sylhet	Mobile	54867							
29	Khulna	Laptop	111895							
30	Dhaka	Monitor	128880							
31	Chattogram	Laptop	48969							
32	Chattogram	Laptop	95246							
33	Dhaka	Mobile	88511							

Q:06
Find the highest Sales Amount for the Laptop product in the Dhaka Region.

ANS: 127674

Formula: =MAXIFS(Table12[Sales Amount],Table12[Product],"Laptop",Table12[Region],"Dhaka")

Solution: MAXIFS scans all Laptop sales in the Dhaka region and returns the single highest amount: 127,674.

Q7

AVERAGEIFS — Average Salary by Gender, Dept & Tenure

	A	B	C	D	E	F	G	H	I	J	K	L	M	N
1														
2	Employee	Department	Gender	Experience	Salary									
3	Sadia	HR	Female	4	52827									
4	Nabila	Sales	Male	8	72974									
5	Rifat	Sales	Male	2	59481									
6	Rahim	Accounts	Male	9	87691									
7	Nabila	Accounts	Female	8	37707									
8	Rahim	Accounts	Male	9	36316									
9	Nadia	Accounts	Male	9	90087									
10	Jui	HR	Male	7	31869									
11	Jui	IT	Male	5	64447									
12	Tania	Sales	Female	8	87140									
13	Karim	Sales	Male	5	39356									
14	Tania	Sales	Male	7	38215									
15	Sohan	IT	Male	6	59229									
16	Sadia	Accounts	Female	5	26284									
17	Rima	IT	Female	8	47063									
18	Tania	IT	Male	10	68997									
19	Sadia	HR	Female	6	62223									
20	Rima	Sales	Female	6	31178									
21	Jui	IT	Male	7	87309									
22	Sohan	IT	Male	5	71314									
23	Rima	IT	Female	9	54627									
24	Nadia	Sales	Female	10	30256									
25	Nabila	HR	Male	5	98278									
26	Sohan	Accounts	Male	8	76329									
27	Sadia	IT	Male	7	49755									
28	Nabila	HR	Male	1	48839									
29	Nabila	IT	Male	1	45590									
30	Sadia	HR	Male	5	27557									
31	Rima	Accounts	Female	4	89043									
32	Rima	Sales	Female	3	69805									
33	Karim	IT	Female	7	63817									

Q:07

Calculate the average Salary of Female employees in the HR Department who have more than 3 years of experience.

ANS: 65776.46154

Formula: =AVERAGEIFS(Table13[Salary],Table13[Gender],"Female",Table13[Department],"HR",Table13[Experience],">3")

Solution: AVERAGEIFS averages Salary for Female employees in the HR Department with more than 3 years of Experience, landing on 65,776.46.

Q8

IF + OR - Flagging High-Value Orders

	A	B	C	D	E	F	G	H	I	J	K
1											
2	Order ID	Units Sold	Total Sales	Order Status		Q:08 Fill Order Status "High Value Order" if Units Sold > 50 OR Total Sales > 1,000,000 - Otherwise "Normal Order"					
3	O001	86	1309756	High Value Order							
4	O002	80	942034	High Value Order							
5	O003	52	1257806	High Value Order							
6	O004	96	884975	High Value Order							
7	O005	72	1180393	High Value Order							
8	O006	100	664547	High Value Order							
9	O007	7	948959	Normal Order		Formula: =IF(OR(B2>50,C2>1000000),"High Value Order","Normal Order")

29	O027	14	1675960	High Value Order							
30	O028	41	112790	Normal Order							
31	O029	16	1345941	High Value Order							
32	O030	40	1619735	High Value Order							

Solution: A nested IF/OR marks an order “High Value Order” when Units Sold exceed 50 or Total Sales exceed 1,000,000, otherwise labels it “Normal Order.”

Q9

IFS - Tiered Delivery Priority

	A	B	C	D	E	F	G	H
1	Order ID	Delivery Days	Delivery Priority					
2	O001	1	Urgent					
3	O002	8	No Urgency					
4	O003	6	No Urgency					
5	O004	8	No Urgency					
6	O005	5	Normal					
7	O006	8	No Urgency					
8	O007	2	Urgent					
9	O008	7	No Urgency					
10	O009	10	No Urgency					
11	O010	5	Normal					
12	O011	7	No Urgency					
13	O012	10	No Urgency					
14	O013	8	No Urgency					
15	O014	1	Urgent					
16	O015	8	No Urgency					
17	O016	3	Normal					
18	O017	7	No Urgency					
19	O018	4	Normal					
20	O019	10	No Urgency					
21	O020	3	Normal					
22	O021	2	Urgent					
23	O022	2	Urgent					
24	O023	6	No Urgency					
25	O024	6	No Urgency					
26	O025	8	No Urgency					
27	O026	10	No Urgency					
28	O027	8	No Urgency					
29	O028	8	No Urgency					
30	O029	5	Normal					
31	O030	4	Normal					
32	O031	8	No Urgency					
33	O032	1	Urgent					

Q-09
Create a formula that returns:
"Urgent" if Delivery Days ≤ 2
"Normal" if Delivery Days ≤ 5
"No Urgency" otherwise

Formula: =IFS(B2<=2,"Urgent",B2<=5,"Normal",B2>5,"No Urgency")

Solution: IFS checks Delivery Days in order - ≤ 2 is "Urgent," ≤ 5 is "Normal," otherwise "No Urgency" to classify every order automatically.

Q10

Project Brief - VM-Wise Pivot Dashboard

Q:10

Create a VM-wise report that provides a detailed breakdown of RT Retails. The report should answer the following questions:

- How many Live Demo units are available under each VM?
- What is the total quantity available in each retail outlet?
- Which product models are available in each retail outlet?
- Which VM has the highest number of Live Demo units?
- Which product model has the highest quantity across all retail outlets?

Create a Pivot Table Dashboard that allows users to analyze Live Demo counts, quantities, and model-wise distribution by VM and Retail Outlet.

You may take help from AI tools to solve this Question 10

The task: Build a VM-wise breakdown of RT Retails covering Live Demo counts, outlet quantities, model availability, and the top-performing VM and model - delivered as an interactive Pivot Table dashboard.

Q11

Pivot Dashboard - Detail View by VM & Outlet

VM	Rt Name	Model	Sum of Qty
Zihad Hasan	AR Telecom	Galaxy A06	1
Zihad Hasan	AR Telecom Total		1
Zihad Hasan	Ashfika telecom	Galaxy A07	1
Zihad Hasan	Ashfika telecom Total		1
Zihad Hasan	Bappy Telecom	Galaxy A17	1
Zihad Hasan	Bappy Telecom	Galaxy A06	1
Zihad Hasan	Bappy Telecom Total		2
Zihad Hasan	Classic Electronics	Galaxy A17	1
Zihad Hasan	Classic Electronics	Galaxy A16	1
Zihad Hasan	Classic Electronics	Galaxy A06	1
Zihad Hasan	Classic Electronics	Galaxy A07	1
Zihad Hasan	Classic Electronics Total		4
Zihad Hasan	Cooling Point	Galaxy A16	1
Zihad Hasan	Cooling Point Total		1
Zihad Hasan	Fahim Mobile Palace	Galaxy A17	1
Zihad Hasan	Fahim Mobile Palace	Galaxy A16	1
Zihad Hasan	Fahim Mobile Palace	Galaxy A06	1
Zihad Hasan	Fahim Mobile Palace	Galaxy A07	1
Zihad Hasan	Fahim Mobile Palace Total		4
Zihad Hasan	Hallo Point_Mobile	Galaxy A17	1
Zihad Hasan	Hallo Point_Mobile	Galaxy A16	1
Zihad Hasan	Hallo Point_Mobile	Galaxy A06	1
Zihad Hasan	Hallo Point_Mobile	Galaxy A07	1

Galaxy S2...
Galaxy T...

VM
Imrul Kayes Asif
Lokkhon Chowdhury
Zihad Hasan

Slicer Setting
Selected Item with data = Pale Blue fill
Selected Item with no data = Red fill
Unselected Item with no data = Red font

I have created a VM-wise report that provides a detailed breakdown of RT Details, including the number of Live Demos, available quantities in each retail outlet and the corresponding product models, featuring an interactive Pivot Table Dashboard with VM, RT Name and Model slicers for effortless analysis.

Solution: The Pivot Table lists every RT outlet and Model under each VM along with its Sum of Qty, giving a full row-level breakdown before any slicer is applied.

Q12

Pivot Dashboard - Filtered by Retail Outlet

	A	B	C	D	E	F	G	H	I	J	K
1	VM	Rt Name	Model	Sum of Qty		Rt Name		Model		VM	
2	Zihad Hasan	J & J Communication	Galaxy A07	1		Hello Salanga		Galaxy A07	Galaxy A16	Zihad Hasan	
3	Zihad Hasan	J & J Communication	Galaxy A17	1		HM Telecom		Galaxy A17	Galaxy A06	Imrul Kayes Asif	
4	Zihad Hasan	J & J Communication	Galaxy A16	1		Idea Gadget		Galaxy A26	Galaxy A36	Lokkhon Chowdhury	
5	Zihad Hasan	J & J Communication Total		3		IG&G		Galaxy A37	Galaxy A56		
6	Zihad Hasan Total			3		Imran Electronics		Galaxy A57	Galaxy M06		
7	Grand Total			3		Irin Telecom		Galaxy S2...	Galaxy S2...		
8						Islam Telecom		Galaxy S2...	Galaxy T...		
9						J & J Communication					
10											
11											
12											
13											
14											
15											
16											
17											
18											
19											
20											

Slicer Setting

Selected Item with data = Pale Blue fill

Selected Item with no data = Red fill

Unselected Item with no data = Red font

Solution: Selecting “J & J Communication” in the RT Name slicer isolates its 3-unit total under Zihad Hasan, with unrelated outlets grayed out.

Q13

Pivot Dashboard - Detail View for Lokkhon Chowdhury

	A	B	C	D	E	F	G	H	I	J	K
1	VM	Rt Name	Model	Sum of Qty

21	Lokkhon Chowdhury	Dighi Telecom	Galaxy A06	1							
22	Lokkhon Chowdhury	Dighi Telecom Total		2							
23	Lokkhon Chowdhury	Electronics Park	Galaxy A37	1							
24	Lokkhon Chowdhury	Electronics Park	Galaxy M06	1							
25	Lokkhon Chowdhury	Electronics Park	Galaxy A57	1							
26	Lokkhon Chowdhury	Electronics Park Total		3							
27	Lokkhon Chowdhury	Electronics Park	Galaxy S25 FE	1							
28	Lokkhon Chowdhury	Electronics Park	Galaxy A36	1							

Slicer Setting
 Selected Item with data = Pale Blue fill
 Selected Item with no data = Red fill
 Unselected Item with no data = Red font

I have created a VM-wise report that provides a detailed breakdown of RT Details, including the number of Live Demos, available quantities in each retail outlet and the corresponding product models, featuring an interactive Pivot Table Dashboard with VM, RT Name and Model slicers for effortless analysis.

Solution: Expanding VM “Lokkhon Chowdhury” breaks down quantity by every retail outlet and model, the same interactive pattern applied per VM.
